

How to Read This Report:

Colors indicate statistical significance (95% confidence level) – meaning the result is mathematically proven to be different from other groups, not just a random fluctuation.

Light Green: Notable difference.

Dark Green: Strong, reliable trend.

Dark Blue: Extreme outlier / High-impact demographic trend.

Gold: High-impact finding – >50 % with 6 + groups outperformed.

Letters identify which column is outperformed. Significance tested at the 95% confidence level ($p < 0.05$).

Multiple-comparison correction: Bonferroni. This adjusts alpha to control the family-wise error rate.

Sample Size Advisory:

If a column has an "n" of less than 50, treat the data as a "suggestion," not a fact. Colors are lightened to reflect lower confidence.

If the n is under 30, ignore the column entirely. Colors are removed – the sample is too small for reliable conclusions.
